An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The Title of the Invention has been changed to: SCROLL TYPE COMPRESSOR HAVING AN ELASTIC MEMBER URGING THE MOVABLE SCROLL MEMBER TOWARD THE FIXED SCROLL MEMBER.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Young et al. disclose a spring (53) biasing the movable scroll member, Yajima has springs (29, 30) supporting the fixed scroll member, Yoshida shows a leaf spring (23) urging the rotation preventing mechanism against the movable scroll member, Nagatomo discloses a spring (21) biasing a thrust ring towards the movable scroll member, and Adachi has a support spring (32) for the fixed scroll member.

The following is an examiner's statement of reasons for allowance:

The claims are allowed because the prior art does not disclose a scroll type compressor having an elastic member formed in an annular and planar shape that is fixed in the housing so as to slidably contact the back surface of the movable scroll member base plate, and having a space for allowing the elastic member to be elastically deformed away from the movable scroll member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
